Really. Move along, folks. Nothing to see here.

If it will save you grief, I can remove that link entirely from that page. But it's on each and every one of our Superfund pages.

There has been no “regional response team” page for several years. We had to link to somewhere that had something to do with emergency response.

If their eyes are wandering around to stuff like that, they are clearly very bored.

Something to fix on the Upper Animas page? I guess there are a LOT of eyes on it, understandably!

Hi Wendy and Tim.

FYI - I just noticed a possible website link problem on the Superfund Upper Animas Mining District webpage - which is a link off of our Emergency Response to August 2015 Release from Gold King Mine webpage.

The text, “Regional Response Teams” take you to [Report Spills and Environmental Violations](#), which does not seem related to me.

Upper Animas Mining District

Site Type: Non NPL
City: Silverton
County: San Juan
Street Address:
ZIP Code: 81433
EPA ID: 085M
SSID: CO0001411347
Site Aliases: Upper Animas Watershed, Upper Cement Creek
Congressional District: 3

What's New?

Updated August 2015

On August 5, an EPA team working to investigate and address contamination at the Gold King Mine in San Juan County, Colo. unexpectedly triggered a large release of mine waste water into the upper portions of Cement Creek. For more information and current updates, visit the [Gold King Mine Release](#) page.

In 2015, EPA's Superfund Remedial program is continuing field investigations at the Upper Animas Mining District site. These investigations include collecting surface water samples during high-flow conditions in June as well as surface water and sediment samples during low-flow conditions in September/October. Both water and sediment samples will be tested for a range of contaminants including heavy metals associated with historic mining activities. EPA also plans to sample mine waste areas in the upper reaches of the Upper Animas River (UA) watershed and the tailings along the UA between Howardville and Fireka upstream of Silverton in early August.
